

Why Asset Maintenance? Why IMPACTxp?

You want to reduce costs, you want to add value and you want a return on your investment. Competition is making companies realise that to stay in the market you must ensure that

- a) the Unit Cost of Production is minimised
- b) service levels to the customer are improved
- c) assets must provide an effective Return on Investment

Effective Asset Maintenance Management can contribute greatly to achieving these objectives by :

- a) Increasing availability of Production Resources
- b) Minimising unscheduled stoppages
- c) Reducing the amount of bad product
- d) Reducing overall Inventory Costs
- e) Improving the utilisation of skilled resources
- f) Extending life of the Asset
- g) Improving the value of the ERP system

All of this can be achieved by using the right system backed up by the right support.

IMPACTxp has been designed to provide organisations with an Asset Maintenance Management system that is flexible enough to meet most requirements, comprehensive in its approach to management reporting, provides a complete range of functionality and is easy to implement.

IMPACTxp has the ability to interface to most corporate systems including Financials, HR and ERP. This interface capability is particularly strong in ERP particularly with MFG/PRO, utilising a common platform, Progress.

IMPACTxp has been implemented in a wide range of industries throughout the world so why not take advantage of this experience and achieve the benefits your organisation deserves.
